

New Materials Alert

Biobased

TPV

The new biobased TPV materials expand our existing biobased portfolio, which already includes TPS and TPO materials.

The Biobased Dryflex TPV materials are available in hardnesses 65 to 85 Shore A with amounts of **biobased content up to around 25%** (ASTM D 6866).

Circular

The Dryflex Circular TPVs are available with amounts of **recycled content up to 28%** (as defined in ISO 15343 section 4).

Heat ageing, oil resistance and viscosity tests have been carried out. Dryflex Circular TPVs offer a broad service temperature range from -50 to +135 °C
