

## SANTOPRENE™ 201-64 - TPV

## **Product Description**

A soft, colorable, versatile thermoplastic vulcanizate (TPV) in the thermoplastic elastomer (TPE) family. This material combines good physical properties and chemical resistance for use in a wide range of applications. This grade of Santoprene<sup>TM</sup> TPV is shear-dependent and can be processed on conventional thermoplastics equipment for injection molding, extrusion or blow molding. It is polyolefin based and recyclable within the manufacturing stream.

### Characteristics

Applications Automotive - Plugs, Bumpers, Grommets, Clips, Automotive - Seals and Gaskets, Industrial -

Seals and Gaskets, Soft Touch Grips, Tubing

**Uses** Appliance components, Automotive applications, Automotive interior trim, Automotive under

the hood, Consumer applications, Diaphragms, Electrical parts, Gaskets, Seals, Tubing

Agency Ratings UL QMFZ2, UL QMFZ8

UL File Number E80017

**Color** Natural color

**Delivery Form** Pellets

Processing Blow molding, Coextrusion, Extrusion blow molding, Injection blow molding,

Injection molding, Multi injection molding, Profile extrusion, Sheet extrusion

# **Processing Notes**

Desiccant drying for 3 hours at  $80^{\circ}$ C ( $180^{\circ}$ F) is recommended. Santoprene<sup>TM</sup> TPV has a wide temperature processing window from 175 to  $230^{\circ}$ C (350 to  $450^{\circ}$ F) and is incompatible with acetal and PVC.

#### **General Disclaimer**

NOTICE TO USERS: Values shown are based on testing of laboratory test specimens and represent data that fall within the standard range of properties for natural material. These values alone do not represent a sufficient basis for any part design and are not intended for use in establishing maximum, minimum, or ranges of values for specification purposes. Colorants or other additives may cause significant variations in data values. Properties of molded parts can be influenced by a wide variety of factors including, but not limited to, material selection, additives, part design, processing conditions and environmental exposure. Any determination of the suitability of a particular material and part design for any use contemplated by the users and the manner of such use is the sole responsibility of the users, who must assure themselves that the material as subsequently processed meets the needs of their particular product or use. To the best of our knowledge, the information contained in this publication is accurate; however, we do not assume any liability whatsoever for the accuracy and completeness of such information. The information contained in this publication should not be construed as a promise or guarantee of specific properties of our products. It is the sole responsibility of the users to investigate whether any existing patents are infringed by the use of the materials mentioned in this publication. Moreover, there is a need to reduce human exposure to many materials to the lowest practical limits in view of possible adverse effects. To the extent that any hazards may have been mentioned in this publication, we neither suggest nor guarantee that such hazards are the only ones that exist. We recommend that persons intending to rely on any recommendation or to use any equipment, processing technique or material mentioned in this publication should satisfy themselves that they can meet all applicable safety and health standards. We strongly recommend that users seek and adhere to the manufacturer's current instructions for handling each material they use, and entrust the handling of such material to adequately trained personnel only. Please call the telephone numbers listed for additional technical information. Call Customer Services for the appropriate Materials Safety Data Sheets (MSDS) before attempting to process our products.
